💡 PROJECTS

Amazon Clone Project

Technologies: HTML, CSS, JavaScript, Responsive Design

Developed a fully functional Amazon-style e-commerce website using HTML for the structure and CSS for layout and design.

Implemented a responsive and mobile-friendly user interface, ensuring a consistent experience across various devices.

Foodie Fantasy

Technologies: HTML, CSS, Responsive Design

Designed and developed a visually appealing website for food enthusiasts, using HTML for content structuring and CSS for styling and layout.

Created an engaging homepage showcasing recipes, restaurant reviews, and food blogs with modern UI design principles.

Blog Website

Technologies: HTML, CSS, JavaScript, Responsive Design

Developed a dynamic blog platform using HTML for structure, CSS for styling, and JavaScript for interactivity. Designed a clean and user-friendly layout featuring blog posts, categories, and comment sections.
